VectorVMS
Vendor Management System

Complete Contingent Workforce Management

The VectorVMS vendor management system (VMS) helps organizations efficiently and effectively manage their entire non-employee workforce. Our system enables you to leverage your contingent and services procurement staff as a strategic component of your overall talent management strategy.

With our highly configurable application, you can implement quickly and economically with high levels of user adoption across your entire organization.

In the first year after implementation, our clients save an average 10% on contingent spend and gain improved visibility, efficiency, and risk mitigation.

As the modern workforce evolves, companies need additional options for procuring top talent. VectorVMS can be used as a stand-alone solution or can serve as the center of your talent ecosystem—delivering a streamlined option to seamlessly connect all your sourcing avenues.

End-to-End Visibility and Control

Get insight into and oversight of every aspect of your contingent labor program—from req to check.

Key Benefits

» **Visibility** – With a single source of record, you gain insight into every aspect of your contingent workforce and can track and control program quality.

» **Efficiency** – Automated processes reduce errors and provide greater control over contingent labor workflow.

» **Risk Mitigation** – The combination of increased visibility and automated compliance reduces risk across your program.

» **Cost Reduction** – With tools to manage rogue spend and enforce standards for rates and invoicing, your organization can save up to 15% of contingent labor spend in the first year after implementing our VMS.

Compliance Management and Risk Mitigation

Ensure NDAs, certifications, drug screens, security access, and other compliance requirements are met in full. With configurable compliance management, you can track workers from pre-engagement through onboarding and off-boarding—across positions and locations.

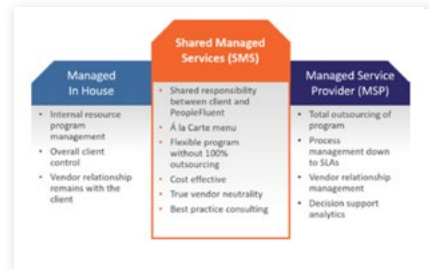

Drive Quality through Visibility

Our VMS allows you to track and control contingent labor spend, headcount, and other key metrics. With a single source of record, you can make data-driven decisions that will increase quality and efficiency across your program.

Delivered to Fit Your Needs

Manage your VMS independently, engage our services team, or outsource your contingent labor program entirely to a MSP. Our VMS solution adapts to your organization's approach and business needs.

Control Costs, Budget with Confidence

In the first year alone, our VMS can save up to 15% of your contingent labor spend. By eliminating rogue spend, standardizing rates, and easily tracking budgets, you can confidently control contingent labor costs.

Key Benefits

» **Compliance Management** – Ensure contingent workers meet all your organization's compliance requirements such as background checks, job certifications, and drug screening.

» **Candidate Compare** – Review and rank candidates side by side and quickly identify top talent with our intuitive composite scoring.

» **Consolidated Invoice Processing** – Approve contractor time online and pay a single invoice for all your contingent labor.

» **Business Intelligence** – Use our 120 standard reports, plus ad hoc capabilities, to improve your program and drive business results based on your data.

» **Self-Service Administration** – Make on-the-fly changes to your workflow and configuration, post implementation.

About VectorVMS

VectorVMS delivers software and services to help businesses optimize their contingent workforce programs. Drawing on 20 years of experience, we help clients and MSP partners control costs, maintain compliance, and drive quality and efficiency throughout the contingent labor lifecycle.
