

# WHAT IS A HYBRID SERVICE MODEL FOR MANAGING YOUR EXTENDED WORKFORCE?

When it comes to managing your extended workforce with a vendor management system (VMS), traditionally you have two choices: either managed in-house or outsourced to a Managed Service Provider (MSP). There are benefits to both of these models.

## Technology License

OR

## MSP

### Technology License Only

100% controlled in-house – your in-house program manager controls program culture

Access to over 100 standard reports via Business Intelligence

You are the system admin for your program

Low cost

### MSP/Outsourced Management

Program is managed by experts

Access to high-quality service and strategic consulting

MSP becomes the system admin

The MSP forms relationships with and manages your vendors

## Take the best of BOTH!

It doesn't have to be an either-or situation. With a hybrid service model, you can have the best of both worlds!

### Hybrid Service Model/Shared Managed Services (SMS)

100% controlled in-house

Lower cost compared to outsourced programs

Customized program provides access to contingent workforce experts who can help manage your program as well as provide strategic consulting

VectorVMS platform built-in for full visibility into your extended workforce

Ready to design your hybrid program? Contact us to learn more about SMS.
