

6 BENEFITS OF A HYBRID CONTINGENT WORKFORCE MANAGEMENT PROGRAM

Shared Managed Services (SMS) from VectorVMS is a hybrid program that allows you to better manage your in-house contingent labor program.

Grow Your Team

You'll have an SMS account manager dedicated to your program. They act as an extension of your team, getting to know you and your strategy.

Save Time

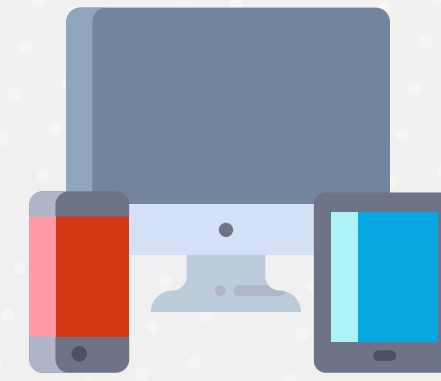

Save time dealing with administration of your VMS by delegating certain tasks to your SMS account manager. According to the Anatomy of Work Index*, "work about work" or time spent managing initiatives through emails, spreadsheets, and meetings takes an average of 35% of time globally.

Expert Insights

You have direct access to a contingent labor expert when you need it. Plus, your account manager analyzes and identifies ways you can improve your program.

Tech Ecosystem Access

In addition to access to features such as direct sourcing, market rate analysis, and advanced shift scheduling, you gain support from your SMS account manager to make the best use of these opportunities.

Build Your Own Program

Choose only the services you truly need to get the job done—we'll make recommendations, but ultimately the choice is yours. We'll work with you to build a program that best fits your organization.

Consolidated Invoice & Payment

SMS eliminates the headache of multiple timesheet and invoice processes through consolidated invoice and payment. You pay one invoice and we take care of the rest. Vendors are paid faster, and your organization benefits from a streamlined approach.
